381	22 Nov	C.P. Steinmetz to Mr. Wooley, City Engineer, Schenectady.

	1912	<p>“Will you please make preliminary plans for the following school buildings which will be required during the next year.” There follows a list of 11 new school buildings, most of them of 16 rooms, to replace or supplement existing buildings. This includes replacement on 6th Ave. New buildings on Guilderland Ave, Fuller Property, Boulevard Section, College Pasture, and ‘near city limits’ replacement of current Clinton and Nott schools. Plan calls for 600 students per school, in 16 graded classes, 1 ungraded class, 1 class for “anemic children”, 1 consulting room, 1 auditorium plus room in basement for manual training and domestic science, and a swimming pool. It “would therefore be desirable to work out tentatively a standard design of school house.”</p>
382	25 Nov 1912	<p>C.P. Steinmetz to Editor, Schenectady Union Star. “Availing myself of your offer of using the columns of your esteemed paper for expression of opinion of the proposed park system.” Comes out “in favor of spending \$100,000 for establishing a rational park system.”The reason: Schenectady is “now on the dividing line: our present actions will decide whether Schenectady shall continue to grow as a prosperous city, or shall become a factory town like the towns on the Allegheny, like Little Falls, Lawrence, etc... full of poverty, squalor and filth... already our beautiful river is an open cesspool... the ravines which intersect the city and when developed would make it one of the most beautiful residential places, are rapidly becoming refuse heaps, dumping grounds for garbage, etc. “ More than half the parents of the pupils of the public schools are employed by “the two large manufacturing companies... Schenectady is essentially an industrial city” but it is not a “factory town” because “a very large number of the employees of these companies enjoy good salaries and wages, which enable them to spend money; they do spend it in making themselves homes and live in the city. But they will not continue to do so if life ceases to be worth living in the city.” Otherwise, “only the poor, the men who receive low wages and have little to spend, will remain in the city, as a squalid factory town full of tenement houses....So by all means, beautify the City, make it attractive so as to keep those of our citizens here, who have made the City a prosperous community and not a mere factory town...” A park system is “one of the best financial investments a city can make, due to the great increase in property value by the neighborhood of well kept parks...” The proposed park system would</p>

		<p>increase the value of 25% of the city's property..."Assuming an assessed value of the city of 50 million dollars, the proposed expenditure for the parks is considerably less than 2%." The park property must all be bought no. If a piece of property is bought and made into an initial part of a park, the adjoining properties will so increase in value as to be too expensive for future purchase. IN summary: "take care of the river front in the 1st and 3rd wards, develop the ravines which intersect the city [including the currently unsightly ravine next to Steinmetz's house], provide park and play ground facilities in the 2nd and 11th wards, etc., etc..... and the proposed bond issue is not too large for this." [Note that the words Central Park, or the idea of one big park, do not appear. Steinmetz did serve on the Park Commission in 1913, and a plan was passed, though for a \$300,000 bond issue rather than \$800,000 thanks to the votes of the Socialist Aldermen. From that beginning, in 2016, Schenectady claims 16 parks: Carrie Street Park --- located on Carrie Street, Central Park --- located on Central Parkway and featuring the Central Park Rose Garden, Fairview Park -- - located on Fairview & Campbell, Front Street Park --- located on Front Street, Grout Park --- located on Hamburg Street, Hillhurst Park --- located on Campbell Avenue, Jerry Burrell Park --- located on Hamilton & Schenectady, Kailberg Park --- located on Lenox Road, Liberty Park --- located on State & Washington, Michigan Avenue Park --- located on Michigan & Norwood, Mt. Pleasant fields --- located on Norwood Avenue, Orchard Park --- located on Orchard Street, Pulaski Park --- located on State & Nott Terrace, Quackenbush Park --- located on Forest Road, Riverside Park --- located on Washington & Ingersoll, South Avenue Park --- located on Park & South Avenue, Steimack Park - located on Cutler & Davis Terrace, Steinmetz Memorial --- located on Wendell Avenue, Steinmetz Park --- located on Lenox Road, Vale Park --- located on Nott Terrace, Veterans' Park --- located on State Street, Wallingford Park --- located on Congress & Fifth, Westinghouse Park --- located on Broadway & Guilderland, Woodlawn Park --- located on Ricci & Kings Road.]</p> <p>]</p>
